EXPERIENCE

Welo Data

Austin, TX, USA

Metadata Analyst

Oct 2024 - Present

- Standardize metadata-quality processes and validation requirements across 100+ international markets, translating partner-specific business rules into onboarding checks.
- Parse and standardize reference-level metadata from 3+ partner XML feeds/month using Python (pandas) ahead of test-environment ingestion.
- Validate AI-matched metadata assets using statistical sampling in Excel to assess mapping accuracy, catching discrepancies before production ingestion into the business workspace.
- Build Tableau dashboards to identify metadata error patterns by partner, locale, content type, and field, then performed root-cause analysis (RCA) to trace recurring issues to partner data sources and provided partners with data-quality findings for correction and resubmission, cutting recurring error rates by 60%.

REL8ED.TO ANALYTICS

Rochester, NY, USA

Data Scientist intern

Jul 2023 - Aug 2023

- Projected \$50K in annual cost savings and cut classification turnaround from weeks to minutes by building an LLM-based industry classification pipeline (OpenAI embeddings + custom NAICS reference dictionary).
- Achieved 85% accuracy validating the pipeline against manual processing, using Excel PivotTables to pinpoint industries with elevated misclassification rates.
- Cleaned and standardized 100K+ North American company records in Python, scraping and structuring NAICS codes into a reusable classification reference.

LEAFPRINT ENTERPRISES

Cedar Hills, UT, USA

Data Analyst intern

Jan 2022 - May 2022

- Built a Python ETL pipeline to integrate World Archive API and Airtable data into AWS RDS, and designed the relational model that turned fragmented sources into a single reporting layer.
- Used SQL to resolve missing and inconsistent geographic attributes across Southeast Asia and Southern Europe, improving regional data accuracy by 25%.
- Built an interactive Excel dashboard to self-service track mapping coverage and data completeness across the team.

BENIT PTY LTD

Hanoi, Vietnam

Data Analyst intern

Mar 2021 - Jul 2021

- Prepared and validated data in SQL and supported experiment analysis in Python across 10+ A/B tests, contributing to a 12% relative lift in course completion.
- Built engagement metrics and learner segments from Redshift data to give the Product team self-service visibility into retention opportunities.
- Analyzed engagement patterns in Python to surface behavioral drivers of completion and churn, informing retention strategy.

EDUCATION

UNIVERSITY OF ROCHESTER

Rochester, NY, USA

M.S in Data Science

Winter 2023

AUGUSTANA COLLEGE

Rock Island, IL, USA

B.A in Applied Mathematics

Summer 2022

TECHNICAL CAPABILITIES

Languages & Analysis: Python (visualization, ML), SQL (Querying, Joins), R (Statistical Modeling, Visualization) **BI & Reporting:** Tableau, Power BI (dashboards, DAX), Excel (Pivot, Regression, Decision Analytics)
